TITANIUM SPONSOR

CEIA USA

CEIA has been in the weapons/metal detection business for 60 years – far longer than anyone else, and we're known the world over as the leader, leveraged by the Department of Homeland Security/TSA and 70% of airports around the world, along with countless K-12 districts and schools, as well as Professional Sports Leagues, Intercollegiate stadiums, National Amusement/Theme Parks, Casinos, Event Venues, Healthcare, Manufacturing and Retail facilities, and more. However, they all leverage a variety of weapons detection technologies; from liquid, letter and shoe bomb detection, to gamma radiation detection used for bombs, as well as IEDs (Improvised Explosive Devices) in war-torn countries, and of course, metal detection. Every single one of our detection technologies is a tool designed for a specific purpose, just like the OPENGATE.

CEIA's dedication to innovation and security ensures the highest standards of excellence. CEIA strives to provide innovative security solutions tailored to meet the specific and ever-changing needs and expectations of customers. CEIA equipment has a strong reputation for reliability and maintenance-free operation. This is achieved through extensive factory testing for product conformance to strict international standards. CEIA SpA and CEIA USA are ISO 9001 certified. Detailed adherence to these ISO 9001 quality standards also provides the traceability to support customers for many years even after equipment goes out of production. The tight procedures employed during the factory acceptance test produce such consistent products that field calibration is often not required.

CEIA's OPENGATE® technology ensures unmatched detection capabilities and versatility with high-throughput metal/weapons detection, providing a quick and more secure entry for students and visitors without delays. OPENGATE® is designed to address the unique security challenges faced by educational institutions, providing a seamless, efficient, and reliable security screening solution. For more information, visit k12.ceia-usa.com

Presenting: Metal vs Weapons Detection – What's the Difference and What's Right For You?
Tuesday, April 28, 01:00PM-01:40PM @ Canaveral 2

CEIA USA • WEAPONS DETECTION THROUGH ELECTROMAGNETICS

CEIA for School Safety and Security

CEIA Weapons Detection and screening systems take the guesswork out of security screening. Incorporating the latest in threat detection technology, CEIA sets the standard for safety, convenience and accuracy. CEIA OPENGATE® features include:

- Versatility & Portability in Applications
- Up & Running in 1 minute
- Faster Screening
- Minimal Training Required
- Cost-effective Ownership

OPENGATE® Weapons
Detection System

SCHOOL PROTECTION

For over 60 years, CEIA has set the standard for metal detection. Our systems move individuals through security checkpoints quickly, while providing one of the industry's highest and most accurate level of threat detection. Our industry leading walk-through and hand-held detectors are easy to use and provide outstanding reliability in school protection. Our solutions include the following:

OPENGATE® Weapons Detection System

- Quickly and automatically screen students with backpacks and bags
- Extremely high throughput with near zero nuisance alarms
- Easy to relocate at 25 pounds and installs in less than 1 minute
- Indoor and outdoor operation

HI-PE Plus Walk-Through Metal Detector (WTMD)

- Multi-zone alarm detection and location indication of all metals with no alarm for non-threat items including cell phones
- Full compliance with the latest Security Standards
- Exceptional immunity to external interferences
- Unmatched reliability

PD240 Hand-Held Metal Detector (HHMD)

- Wide search area for faster and more accurate screening operations
- Combines high reliability with advanced detection and operator signaling features.
- Indoor and outdoor operation
- Floor rebar rejection

PD140N Hand-Held Metal Detector (HHMD)

- Compact and lightweight
- Combines consistent performance and calibration-free operations.
- Extended continuous operation time.
- Unmatched reliability

Comprehensive Support

CEIA USA is dedicated to providing our customers with superior service and support. We provide training on all of our units, and can even customize a session to meet your specific needs. In addition, our experts are available to offer you technical support by phone. If your CEIA unit needs service or repair, our technicians can handle your needs at our facility or yours.

GOLD SPONSOR

Evolv Technology

Evolv (NASDAQ: EVLV) is designed to transform human security by helping organizations detect potential threats, mitigate risk, and enhance safety using AI-powered security solutions with robust insights. Our technology has helped to create efficient and positive security screening experiences for the world's most iconic venues and companies as well as schools, hospitals, and public spaces. Evolv's mission is to create a safer world to live, work, learn, and play. Evolv's advanced systems have scanned more than 4 billion people since 2019. Evolv Express® has been awarded the U.S. Department of Homeland Security (DHS) SAFETY Act Designation as a Qualified Anti-Terrorism Technology (QATT) and Evolv eXpedite™ has been awarded the Safety Act Developmental Testing and Evaluation Designation. Evolv and its products have been awarded numerous awards which can be viewed on our Certifications and Awards web page.

SILVER SPONSOR

MIS Security

Since 2006, MIS Security has been pushing the limits of what is possible in public safety. Our patented sensor technologies were originally developed for the military to protect our soldiers. Using real world weapons, and in conjunction with the US military, we created an extremely effective device for that world.

Explore Evolv's Connected & Layered Security Approach

Technology alone doesn't stop threats—people do. That's why Evolv takes an end-to-end approach to security, designing systems that not only detect threats but also empower operators to resolve them with confidence. Our solutions strike a critical balance—consistently detecting many potential threats while distinguishing them from many common everyday items*—designed to deliver strong security with an efficient screening experience.
